PAPER**

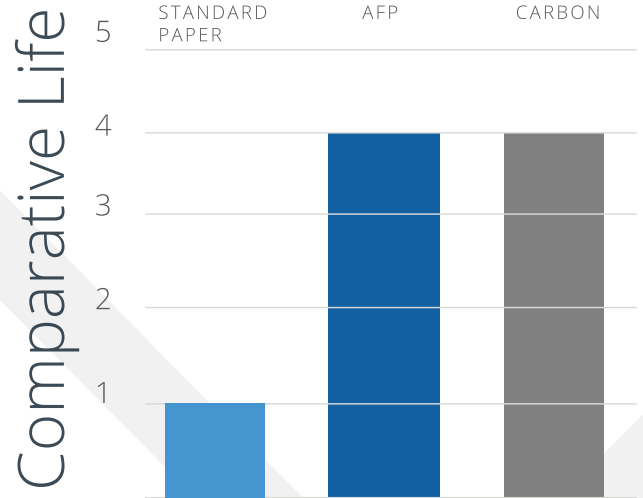

LONG LIFE FRICTION MATERIAL FOR MINING BRAKES

Sintech offers an Advanced Friction Paper (AFP) giving extended life in mining Truck Wet Brake Applications.

Man made fibres improve the Heat Resistance of the Friction +\wg Material and gives stable braking power, together with superior engagement.

AFP can more than double the life of a brake using standard Friction Paper, with tests proving significant cost savings in heavy duty applications. Thermal bonding also helps in strengthening the material, leading to better wear rates and longer life.

AFP has been extensively tested in many machines World-Wide, giving significantly improved life over Standard Paper, and similar life to Carbon Paper, between two and four times the life.

Using AFP Friction Plates can give as much as 50% savings in the number of replacements required during the life of the vehicle. Leading to similar savings in labour time and other costs associated in rebuilding the wet brake units.

LEVEL 1 CONTRIBUTOR

CERTIFICATIONS

Sintech have been associated with TUV since 1998 and both JHB and Durban branches have been approved for ISO 9001:2015

We are currently a Generic Level 1 under the new codes with 51% Black ownership and 100% procurement recognition. Sintech are committed to Black Economic Empowerment and are continuously looking to maintain and indeed improve our standing with suppliers and customers alike. Our current certificate is available from our website or can be emailed on request.
